

Computer-Aided design and simulation of manufacturing processes - opis przedmiotu

Informacje ogólne

Nazwa przedmiotu	Computer-Aided design and simulation of manufacturing processes
Kod przedmiotu	06.9-WM-ZiLP-IJ-ANG-D-17_20
Wydział	<u>Wydział Mechaniczny</u>
Kierunek	Management and Production Engineering
Profil	ogółnoakademicki
Rodzaj studiów	drugiego stopnia z tyt. magistra inżyniera
Semestr rozpoczęcia	semestr zimowy 2020/2021

Informacje o przedmiocie

Semestr	2
Liczba punktów ECTS do zdobycia	3
Typ przedmiotu	obowiązkowy
Język nauczania	angielski
Syllabus opracował	• dr hab. inż. Sławomir Kłos, prof. UZ

Formy zajęć

Forma zajęć	Liczba godzin w semestrze (stacjonarne)	Liczba godzin w tygodniu (stacjonarne)	Liczba godzin w semestrze (niestacjonarne)	Liczba godzin w tygodniu (niestacjonarne)	Forma zaliczenia
Laboratorium	30	2	18	1,2	Zaliczenie na ocenę

Cel przedmiotu

The aim of the course is to acquaint students with the method of computer simulation and familiarization with the techniques of building simulation models of processes and production systems. After completion of the course students should be able to use the selected software to simulate production processes (eg. Tecnomatix Plant Simulation, Enterprise Dynamics, Arena, etc.), model building (mapping the actual system in a form of a simulation model), Designing of simulation experiments and analysis of research results.

Wymagania wstępne

Knowledge of basic production processes implemented in enterprises.

Zakres tematyczny

Computer simulation as a research method - introduction. Stages of the construction of a simulation model. Generating pseudorandom data based on various probability distributions. Basic objects needed to build the simulation model of the production system. Planning of a simulation experiment. Modelling and simulation of discrete manufacturing processes. Modelling and simulation of assembly processes. Analysis of the efficiency of utilization of production resources. Analysis of the efficiency of logistics processes and inventory levels of work in progress. Analysis of the effectiveness of employees on the basis of a simulation model of the production system.

Metody kształcenia

Laboratory – practical classes carried out with the use of a selected simulator.

Efekty uczenia się i metody weryfikacji osiągania efektów uczenia się

Opis efektu	Symbol efektów	Metody weryfikacji	Forma zajęć
The student has an orderly, theoretical knowledge of computer-aided management in an enterprise.	• K_W09	• kolokwium	• Laboratorium
The student is able to obtain, integrate and interpret knowledge, draw conclusions and formulate opinions on the basis of catalogue entries issued by manufacturers of appliances, advertising material, information obtained from literature, databases and other modern means of communication, which relate to issues of mechanical engineering and management methods in this field.	• K_W04 • K_U04	• kolokwium • projekt	• Laboratorium
The student is able to choose and use appropriate computer applications for calculation, simulation, designing and verification of solutions related to Management and Production Engineering.	• K_U12	• kolokwium • projekt	• Laboratorium
The student is able to think and act both creatively and entrepreneurially.	• K_K06	• wykonanie sprawozdań laboratoryjnych	• Laboratorium
The student has knowledge of development trends and new developments in manufacturing engineering.	• K_W16	• kolokwium	• Laboratorium

Warunki zaliczenia

Laboratory – final grade is the weighted sum of grades obtained for the completion of individual laboratory classes.

Literatura podstawowa

1. S. Bangsow, Tecnomatix Plant Simulation: Modeling and Programming by Means of Examples, Springer; 2016
2. S. Bangsow, Manufacturing Simulation with Plant Simulation and Simtalk: Usage and Programming with Examples and Solutions, Springer, 2010
3. G. L. Curry, R. M. Feldman, Manufacturing Systems Modeling and Analysis, Springer, 2010

Literatura uzupełniająca

1. Tecnomatix on-line documentation
