lecture, discussion, project method

Efekty uczenia się i metody weryfikacji osiągnięcia efektów uczenia się

Opis efektu	Symbole efektów	Metody weryfikacji	Forma zajęć
The student has a basic knowledge of human sexuality in the lifetime cycle, sexual health, the biological, social and cultural conditions and regularities of human psychosexual development. The student has an elementary knowledge of the different types of social structures and institutions of society and the relationships between them The student is able to observe and interpret the behavior and opinions of pupils and make a diagnosis of sexual mores change The student can use the knowledge in the scope of sexual education for the analysis and interpretation of the behavior of pupils, using the criteria of sexological development norm standards and can diagnose the extent of risky sexual behaviors of young people to develop prevention projects in this area. The student is convinced to the need to apply the acquired knowledge to design activities that support the psychosexual development of children and young people and prevention of risky sexual behaviors. The student has the conviction of the importance of behaving in a professional and ethical way in situations that need support for pupils in connection with the occurrence of difficulties in their psychosexual development.		The lectures end with an exam. The verification method of learning outcomes is a test. Classes end with grade. The verification methods is the presentation or an essay about selected course topic.
