

Fundamentals of scientific research methodology - opis przedmiotu

Informacje ogólne	
Nazwa przedmiotu	Fundamentals of scientific research methodology
Kod przedmiotu	06.9-WM-ZiIP-ANG-D-10_20
Wydział	Wydział Mechaniczny
Kierunek	Management and Production Engineering
Profil	ogólnoakademicki
Rodzaj studiów	drugiego stopnia z tyt. magistra inżyniera
Semestr rozpoczęcia	semestr zimowy 2023/2024

Informacje o przedmiocie	
Semestr	1
Liczba punktów ECTS do zdobycia	2
Typ przedmiotu	obowiązkowy
Język nauczania	angielski
Sylabus opracował	<ul style="list-style-type: none">dr inż. Agnieszka Kaczmarek-Pawelska

Formy zajęć					
Forma zajęć	Liczba godzin w semestrze (stacjonarne)	Liczba godzin w tygodniu (stacjonarne)	Liczba godzin w semestrze (niestacjonarne)	Liczba godzin w tygodniu (niestacjonarne)	Forma zaliczenia
Projekt	15	1	-	-	Zaliczenie na ocenę
Wykład	15	1	-	-	Zaliczenie na ocenę

Cel przedmiotu

The aim of the course is: to prepare the student to write his master's thesis, i.e. gain knowledge of the general methodological foundations of scientific research, research process, research methods and tools, methodics for preparing scientific work and practical skills in conducting research work and presenting its results.

Wymagania wstępne

Zakres tematyczny

Lecture:

W1. Requirements for a master thesis. Differences between engineering and master's thesis.

W2. Copyright and ethical problems.

W3. Types and role of sources of scientific information in creating scientific papers. Documenting sources.

W4. The technique of writing the master's thesis. Work structure.

W5. Editorial requirements and editing rules.

W6. Research process. Purpose of research. Hypothesis.

W7. Research methods used in the process of creating the MA thesis. Data collection methods.

W8. Methodology for preparing scientific work.

W9. Techniques of writing master's theses - development of the main material.

W10. Techniques of writing master's theses - charts, drawings, tables, lists.

W11. Research tools.

W12. Scientific observation.

W13. Experimental research.

W14. Forms of presentation of own research results.

W15. Criteria for the evaluation of the MA thesis. Diploma exam.

Project:

P1-2. Choosing a topic and developing a final work plan.

P3-4. Selection of literature and documenting sources.

P5-7. Preparation of the final work.

P8-9. Consultation regarding final work.

P10-11. Correction of final work.

P12-13. Editorial work.

P14-15. Preparation of the final work presentation.

Metody kształcenia

Lecture: informative and problem lecture, talk, slide-show, demonstration.

Project: practical exercises, methodical workshops, project method, problem discussion.

Efekty uczenia się i metody weryfikacji osiągnięcia efektów uczenia się

Opis efektu	Symbole efektów	Metody weryfikacji	Forma zajęć
The student is able to formulate and test hypotheses, related to engineering problems and simple research problems, related to Management and Production Engineering.	<ul style="list-style-type: none">• K_U19	<ul style="list-style-type: none">• konspekt• obserwacje i ocena umiejętności praktycznych studenta• praca pisemna	<ul style="list-style-type: none">• Projekt
The student is able to prepare -and orally present- some selected issues, related to Management and Production Engineering in Polish and in a foreign language.	<ul style="list-style-type: none">• K_U06	<ul style="list-style-type: none">• konspekt• obserwacja i ocena aktywności na zajęciach• praca pisemna	<ul style="list-style-type: none">• Projekt
The student is able to prioritise and carry out his/her own tasks as well as the tasks of others.	<ul style="list-style-type: none">• K_K04	<ul style="list-style-type: none">• bieżąca kontrola na zajęciach• przygotowanie projektu	<ul style="list-style-type: none">• Projekt
The student is able to obtain information from literature, databases and other sources and is able to integrate, interpret and critically evaluate it, as well as draw conclusions, therefrom, both formulating it and sufficiently justify opinions on it.	<ul style="list-style-type: none">• K_U01	<ul style="list-style-type: none">• konspekt• obserwacje i ocena umiejętności praktycznych studenta• praca pisemna	<ul style="list-style-type: none">• Projekt
The student is able to prepare, document in writing and elaborate issues in technical sciences and in the scientific disciplines relevant to Management and Production Engineering, viz., production engineering, the engineering of materials, the building and operating of machines, mechanics, automation and robotics, management, presenting the results of his/her research in writing, in Polish and in English.	<ul style="list-style-type: none">• K_U05	<ul style="list-style-type: none">• konspekt• obserwacje i ocena umiejętności praktycznych studenta• praca pisemna	<ul style="list-style-type: none">• Projekt
The student understands the basics, the techniques, the tools and the materials used for solving complex, production engineering tasks.	<ul style="list-style-type: none">• K_W18	<ul style="list-style-type: none">• bieżąca kontrola na zajęciach	<ul style="list-style-type: none">• Wykład
The student has basic knowledge regarding the protection of industrial and intellectual properties and is also able to use patented information data.	<ul style="list-style-type: none">• K_W21	<ul style="list-style-type: none">• bieżąca kontrola na zajęciach• praca pisemna	<ul style="list-style-type: none">• Wykład• Projekt

Warunki zaliczenia

Lecture: credit with grade - according to a written test (min. 51% for passing the grade) and ongoing checking / grading of messages during classes.

Project: credit with grade - (classes of a practical, practical nature) takes place on the basis of projects / outlines / written works and activity during classes.

Final grade: the final grade is determined on the basis of the arithmetic average of the grades for the project and lecture with the same weight (50% lecture, 50% project).
